Melik Samed ALMACI

DEVELOPER

Ankara/Sincan | almaci66@gmail.com | https://linktr.ee/samedalmaci

A .NET Developer with a strong foundation in C#, .NET, Python, and SQL, proficient in developing desktop applications, web services, and database-driven systems. Adaptable to Agile work environments, experienced in using Git for version control, and well-versed in object-oriented programming (OOP) principles. Developed an e-commerce application using Angular for the frontend and Onion Architecture-based .NET backend. Also contributed to the frontend development of a corporate website. Eager to leverage skills to develop efficient and high-performance software solutions in a professional setting.

Area Of Expertise

Programming Languages
C#, Python, JavaScript, C++

Frameworks & Libraries
.NET Core, ASP.NET MVC, Entity Framework,

Database Management
SQL Server, MySQL

Development Tools
Visual Studio, Visual Studio Code, Git

Web Technologies:
Web Technologies: HTML5, CSS3

Work Experience

Developer Intern | July 2023 - August 2023
Illumate Studios

- Actively participated in game development processes using Unity and C#.
- Gained experience in team code sharing and branch management with Git version control system.
- Focused on writing modular and reusable code following SOLID principles.
- Improved coding standards knowledge by participating in team code review processes.
- Worked on developing and optimizing game mechanics, increasing performance by 25%.
- Contributed to the completion of 4 projects by the end of my internship.

Education History

Burdur Mehmet Akif Ersoy Üniversitesi | 2020 - 2024
Computer Engineering

- I received comprehensive training in software development, OOP, database management, .NET Framework, and C#. During my studies, I developed several projects to apply my knowledge, focusing on areas essential for .NET development.

Additional Information

Languages : English | Conversation

Certifications : MVC | C# | Python | Cybersecurity | Game Developer | Angular

Selected Projects :
- CarbEqual: C# Windows Forms app for carbon footprint tracking using OpenAI API and JSON.
- SignalR Chat: Real-time messaging app with ASP.NET Core and SignalR.
- gRPC File Transfer: Fast file transfer system using gRPC.
- E-Commerce App: Angular frontend with .NET backend (Onion Architecture).
- Web Frontend: Contributed to frontend development of a corporate website.
